

STATE OF CALIFORNIA

CALIFORNIA INTEGRATED WASTE MANAGEMENT BOARD

**Base Year Modification Request Certification**

**Part 2: Generation Study - Includes Extrapolation of Residential or Non-Residential Diversion Data**

To request a substitution for a previously approved base year used in calculating the diversion rate for your jurisdiction, please complete and sign this form and return it to your Office of Local Assistance (OLA) representative at the address below, along with any additional information requested by OLA staff. When all documentation has been received, your OLA representative will work with you to prepare for your appearance before the Board. If you have any questions about this process, please call (916) 341-6199 to reach your OLA representative.

Mail completed documents to:

**California Integrated Waste Management Board**  
**Office of Local Assistance (MS - 25)**  
**1001 I Street**  
**PO Box 4025 (mailing address)**  
**Sacramento, CA 95812-4025**

**General Instructions:**

Please select the **ONE** choice below that best explains your request to the Board.

1. Use a recent generation-based study to calculate our current reporting year generation amount, but not officially change our existing Board-approved base year.
2. Use a recent generation-based study to officially change our existing Board-approved base year to a new base year.

The shaded cells on these sheets are protected . If you have problems using these sheets, please contact your Office of Local Assistance representative by calling (916) 341-6199

**Section I: Jurisdiction Information and Certification**

*All respondents must complete this section.*

I certify under penalty of perjury that the information in this document is true and correct to the best of my knowledge, and that I am authorized to make this certification on behalf of:

Jurisdiction Name <b>City of Tustin</b>	County <b>Orange</b>		
Authorized Signature	Title		
Type/Print Name of Person Signing <b>Joe Meyers, Administrative Services Manager</b>	Date <b>26-May-02</b>	Phone (      ) Include Area Code <b>714-573-3173</b>	
Person Completing This Sheet (please print or type) <b>Michael Balliet, Consultant</b>	Title		
Affiliation: <b>Consultant retained by Federal Disposal Service</b>			
Mailing Address <b>300 Centennial Way</b>	City <b>Tustin</b>	State <b>CA</b>	ZIP Code <b>92670</b>
E-Mail Address <b>jmeyers@tustinca.org</b>			

**Section II: Information for New Generation-Based Study**

**Attach additional sheets if necessary—reference each response to the appropriate cell number (e.g.,**

**Note: New base years must be representative of a jurisdiction's disposal and diversion.**

**1. Current Board-approved existing base year:**

**1990**

**2. Proposed new generation-based study year:**

**2001**

**3. Explain how the proposed generation study year is representative of average annual jurisdiction disposal and diversion:**

Year 2001 disposal and diversion data uncovered contains no anomalies that would render this data an inaccurate predictor of current and future waste generation in the City of Tustin. Disposal data corresponds with the CIWMB's current disposal reporting system and all diversion data was obtained using CIWMB approved methodologies and conversion factors.

**4. Enter diversion rate information below.**

Diversion rate calculated using existing base year	a. 29 %	Diversion rate calculated using new generation-based study	b. 35 %
For existing base year pounds/person/day based on generation	12.45	For new generation based study pounds/person/day based on generation	10.02
Residential generation 30 %	Non-Residential generation 70 %	Residential generation 17 %	Non-Residential generation 83 %
Population existing generation-based study	50689	Population new generation-based study	69199

**5. If there is an increase from 4a to 4b, please explain how the new diversion rate is consistent with your current diversion implementation efforts. If the proposed new generation tonnage results in an increase in your pounds/person/day, please explain how this is consistent with your current diversion implementation efforts and provide examples (e.g., change in jurisdiction's demographics).**

The 1990 waste generation study did not include diversion tonnage information for the majority of businesses in the City. The total commercial/industrial diversion contained in the 1990 study did not accurately reflect the level of existing level of recycling in the City's business community. Increases in the base-year diversion rate and pounds/person/day figures, from 1990 to 2001, are attributable to the inclusion of business diversion data in the new base-year study.

**6. If the difference between the proposed diversion rates in 4a and 4b is greater than 5 percentage points, please explain the specific reasons for the difference. (For example: new/improved curbside diversion programs.)**

As explained above, a significant portion of the City's commercial and industrial diversion was not included in the original (1990) base-year study. In addition, the City has established greenwaste and commercial diversion programs in the intervening years. Other reasons for the increased diversion rate is the refinement and expansion of residential curbside recycling and the free commercial/industrial recycling program for mixed materials.

## 7. Disposal Tonnage (enter values):

Please select the ONE choice below that

- a. All tons claimed are from the Board's Disposal Reporting System (No explanation required. Go to Section 8.)

b. All tons claimed are from a 100 percent audit of hauler and self-haul tonnage. (Please complete Reporting Year Certification sheet found at [www.ciwmbc.ca.gov/LGCentral/Forms/rhnmdrq.doc](http://www.ciwmbc.ca.gov/LGCentral/Forms/rhnmdrq.doc))

c. Some Disposal Reporting System data were corrected. (Please complete Reporting Year Tonnage Modification Central/Forms/rhnmdrq.doc)

Residential	Non-Residential	Total
12426	69392	81818

**Resposial data and complete the required tables.**

Reporting System (No explanation required. Go to Section 8.)

er and self-haul tonnage. (Please complete Reporting Year Tonnage Modification Request and ns/rhymdrq.doc)

ed. (Please complete Reporting Year Tonnage Modification Request and Certification sheet found at [www.civmrb.ca.gov/G](http://www.civmrb.ca.gov/G)

**8.** In the table below, list the summarized diversion activities and diversion data records that support your claim and are available for Board audit. (Note: the Board expects the jurisdictions to be able to provide all backup documentation, if requested.) Include type of record and location—for example, weight tickets from transfer stations. This section should capture all diversion tonnage (sheet will perform all addition calculations). If any diversion is from restricted wastes (i.e., agricultural wastes, inert solids [e.g. concrete, asphalt, dirt, etc.], white goods, and scrap metal], please identify those programs/waste types and fill out section 11. Note: Restricted waste material should not be extrapolated in non-residential waste audits. Please mark as attachment 8 all copies of survey sheets.

**Note:** The Board has indicated that it will be scrutinizing total source reduction amounts greater than 5% of total generation. Please be prepared to provide additional details substantiating your claim.

### 9. Specific Non-Residential Sector Waste Audits—Top 10 Non-Residential Generators

Please complete this table for the top 10 non-residential generators that were surveyed. List each non-residential generator separately from the largest to smallest, based on total diversion tons. The audit reference number should correspond to the number

Include copies of survey sheet(s) used.

Include for each generator (use type of generator in lieu of specific generator name e.g., grocery store) each specific diversion activity and material type (e.g. cardboard recycling) and the associated tonnage for each diversion activity/material

If using the number of employees for your extrapolation method, include this information for each generator surveyed.

Please order the non-residential generators, largest to smallest, based on total diversion tons.

As a comparison between disposal from the waste audits and DRS, the disposal for each generator must be included in the summary. Also, you should note if the disposal is being used for the extrapolation calculation. For each non-residential generator

Type of Non-Residential Generator	Audit Reference Number	Specific Diversion Activities Including Material Type (e.g. paper recycling, grasscycling).	Number of Employees	Source Reduction Tons	Recycling Tons	Composting Tons	Total Diversion Tons	Percent of Total Generation (Total Tons/Total Generation In Section 8)	Percent of Total Generation (Total Tons/Metted Phone (P) Mail (M) On-site (O) Other —)	Survey Method
Wholesale Goods	7	OCC recycling and reuse, Metal recycling	125	0	1232	0	1231.85	1.0%	0	
Golf Course	3	Grasscycling, Cooking oil/grease recycling	65	1178	4	0	1181.6	0.9%	0

Retailer	60	OCC, Meat/Bone, Produce, Plastics recycling	19	0	246	213	458.65	0.4%	NA	
Retailer	58	OCC, Meat/Bone, Produce, Plastics recycling	30	0	246	194	439.98	0.3%	NA	
	Totals		1454	1178	5398	1226	7802	6.2%	NA	

Summarize the non-residential diversion activities for the top 10 generators quantification methodology and applicable conversion factors and sources (e.g., cardboard recycling; quantified by monthly tonnage receipts provided by the contact person at the business).

Cardboard Reuse and Recycling - Business 7, 4, 2, 6, 8, 60, and 59

**Business 7** reported that they bale 4-5 bales a day weighing approximately 1500 pounds each.

**Business 4** reported actual records kept by the business.

**Business 2** reported actual records provided by the recycler.

**Business 6** reported that they take 3 cubic yards every two weeks weighing 50.08 pounds per cubic yard.

**Business 8** reported that they recycle 5,000 pounds of cardboard every eight weeks.

**Business 60** reported actual records kept by the company.

**Business 59** reported actual records kept by the company.

Metal - Business 7, 4, and 2

**Business 7** reported that they recycle approximately one pound of aluminum cans per day.

**Business 4** reported actual records kept by the business.

**Business 2** reported actual records provided by the recycler.

Grasscycling - Business 3

**Business 3** reported that they use mulching mowers to mow 160 acres.

Grease Recycling - Business 3

**Business 3** reported that the kitchen recycles approximately 140 pounds of grease per week.

Woodwaste Mulching and Composting - Business 2 and 4

**Business 2** reported actual records provided by the recycler.

**Business 4** reported actual records kept by the business.

Concrete, Stucco, Tile, Recycling - Business 1

**Business 1** reported that they recycle concrete, stucco and tile at construction sites. One hundred building permits were issued at 8 tons per home was used as a conversion factor.

Paper Recycling - Business 4, 2, 5, and 8

**Business 4** reported actual records kept by the business.

**Business 2** reported actual records provided by the recycler.

**Business 5** reported that their records shows an annual average of 556 tons of paper recycled.

**Business 8** reported actual records kept for paper recycling.

Wood Pallet Reuse - Business 8

**Business 8** reported that they own 120 pallets that they use internally in their warehouse.

Plastic Recycling - Business 4, 2, 6, 60, and 59

**Business 4** reported actual records kept by the business.

**Business 2** reported actual records provided by the recycler.

**Business 6** reported that they recycle three cubic yards of plastic twice a month weighing approximately 40 pounds per cubic yard.

**Business 60** reported actual records kept by the company.

**Business 59** reported actual records kept by the company.

Glass, latex, other Recycling - Business 4

**Business 4** reported actual records kept by the business.

Foam Recycling - Business 4

**Business 4** reported actual records kept by the business.

Meat/Bone Composting - Business 60 and 59

**Business 60** reported actual records kept by the company.

**Business 59** reported actual records kept by the company.

**Produce Composting - Business 60 and 59**

**Business 60** reported actual records kept by the company.

**Business 59** reported actual records kept by the company.

**10.** On a separate sheet of paper, "marked Attachment 10," provide the following information for each diversion program listed in Section 8 that was extrapolated from representative sampling. **Note:** *Do not include non-respondents in extrapolation because there is no data from the non-respondents. Extrapolate from survey respondents.*

**A. Describe sampling method, including:**

- Type of sampling method (for either stratified or cluster sampling, provide detailed information on how strata and clusters were collected)
- Total number of samples included in the survey
- Number of non-respondents and respondents
- Total population
- Source for identifying population (e.g., city business licenses, commercial database, resident's addresses, etc)
- Relation of sample size to total population
- Survey data collection tool(s) and approaches
- Confidence level and margin of error for the sampled population
- Unusual outliers and exceptional anomalies describe in detail.

**Note:** *Outliers (specific generators which fall significantly above or below others) should be removed from base amount prior to extrapolation)*

**B. Describe the methods used to prevent double-counting between the surveys and the reported tonnages from haulers, recyclers, materials recycling facilities and composters.**

**C. Describe extrapolation method, including:**

- Basis of extrapolation
- Why this extrapolation method is appropriate
- Sources of information used for extrapolation, such as disposal or employment
- Include all calculations

**11.** For each restricted waste type (i.e., agricultural waste, inert solids [e.g., concrete, asphalt, dirt etc.] scrap metals, and white goods [PRC section 41781.2]) and associated program, please provide the following information:

a. If the diversion program started on or after January 1, 1990, complete the following table.

**Note:** program name refers to one specific diversion program for that waste type (e.g., "diversion conducted by city public waste department.)

Restricted Waste Type	Specific Program Name	Year Started	Tonnage
Inert Solids	Concrete, stucco and ceramic tile diversion at construction sites conc	1999	800
Scrap Metal	Metal recycling	2000	47
Pull Down for Waste Types			
Pull Down for Waste Types			
Pull Down for Waste Types			
Pull Down for Waste Types			

b. If the diversion program started before January 1, 1990 - and if documentation on the program and waste type has not been approved by the Board - on a separate sheet marked "Attachment 11b," give the program and waste type, and provide documentation that indicates:

- How the diversion was the result of a local action taken by the jurisdiction, which specifically resulted in the diversion (PRC sec. 41781.2 [c] [1]).
  - That the amount of that waste type diverted from the jurisdiction in 1990 was less than or equal to the amount of that waste type disposed at a permitted disposal facility by the jurisdiction in any year before 1990. *Note: this criterion is applicable to the entire jurisdiction, not to individual programs (PRC sec. 41781.2 [c] [2]). Please include documentation.*
  - The jurisdiction is implementing, and will continue to implement, the diversion programs in its Source Reduction and Recycling Element.

**Note:** If documentation for a waste type and program has already been approved by the Board, you do not have to provide an attachment 11b for that waste type and program.

Instead, please provide date of Board approval of previous submitted information.)

(Date)

If documentation is not available, go to 11d.

c. If the diversion program started before January 1, 1990, and the documentation requested in 11b is available (but not yet approved by the Board), complete the table below for each program claimed:

d. If the diversion program started before January 1, 1990, and the documentation requested in 11b is not available, please complete the table below for each program claimed. *Note: Only the difference between the new base year/reporting year and 1990 can be counted in the diversion rate calculation.*

## Section 9 Attachment 1 - City of Tustin Waste Generation Study

Non-Residential Waste Audits			Annual Tons Source Reduction	Annual Tons Recycled	Annual Tons Composted		
Audit #	Business Name	Diversion Activity	Material Type	Conversion Factor and Source
